Started on	Sunday, 6 October 2024, 12:21 AM
State	Finished
Completed on	Sunday, 6 October 2024, 12:29 AM
Time taken	7 mins 18 secs
Marks	10.00/10.00
Grade	**100.00** out of 100.00
Name	DHIRU BHAI 730423104017

Question 1

Correct

Mark 1.00 out of 1.00

What is the output of the below code?

```
class Student
{
    private String name;

    public void setName(String name)
    {
        if(name != "")
            this.name = name;
    }
    public String getName()
    {
        return name;
    }
}
public class Main
{
    String name;
    public static void main(String[] args)
    {
        Student s = new Student();
        s.setName("Guru");
        System.out.println(s.name);
    }
}
```

a. Guru

b. Run Time Error

c. Compile Time Error ✔

d. Exception will be generated

Question 2

Correct

Mark 1.00 out of 1.00

Is this code proper encapsulation?

```
1  class Student
2  {
3      String name;
4
5      public void setName(String name)
6      {
7          if(name != "")
8              this.name = name;
9      }
10     public String getName()
11     {
12         return name;
13     }
14 }
15 public class Main
16 {
17     String name;
18     public static void main(String[] args)
19     {
20         Student s = new Student();
21         s.setName("Guru");
22         System.out.println(s.getName());
23     }
24 }
25
```

a. getName should be a return void data type

b. line 3: String member name should be have been declared as private ✔

c. line 5 & 10: Methods should be private and not public

d. setName should not be void return data type

Question 3

Correct

Mark 1.00 out of 1.00

If data members are private, what can we do to access them from the class object?

- a. Create public member functions to access those data members ✔
- b. Create private member functions to access those data members
- c. Create protected member functions to access those data members
- d. Private data members can never be accessed from outside the class

Question 4

Correct

Mark 1.00 out of 1.00

What is encapsulation?

- a. Bundling of data and methods ✔
- b. Bundling of objects and methods
- c. Bundling of class and object
- d. None of the above

Question 5

Correct

Mark 1.00 out of 1.00

What is the output of the below code?

```
class Student
{
    private String name;

    public void setName(String name)
    {
        if(name != "")
            this.name = name;
    }
    public String getName()
    {
        return name;
    }
}
public class Main
{
    String name;
    public static void main(String[] args)
    {
        Student s = new Student();
        s.setName("Guru");
        System.out.println(s.getName());
    }
}
```

a. Compile Time Error

b. Guru ✔

c. Blank - No Output

d. Run Time Error

Question 6

Correct

Mark 1.00 out of 1.00

What is the output of the below code?

```
class Student
{
    String name;

    public void setName(String name)
    {
        if(name != "")
            this.name = name;
    }
    public String getName()
    {
        return name;
    }
}
public class Main
{
    String name;
    public static void main(String[] args)
    {
        Student s = new Student();
        s.setName("Guru");
        System.out.println(s.name);
    }
}
```

a. Compile Time Error

b. Exception will be generated

c. Guru ✔

d. No response

Question 7

Correct

Mark 1.00 out of 1.00

Protection of variables from other classes in encapsulation is implemented by using the below access modifer_____

- a. public
- b. private ✔
- c. protected
- d. static

Question 8

Correct

Mark 1.00 out of 1.00

Encapsulation is also called as?

- a. Data Hiding ✔
- b. Data morphing
- c. Data backup
- d. Big Data Analytics

Question 9

Correct

Mark 1.00 out of 1.00

What is the issue in the below implementation of encapsulation?

```
1  class Student
2  {
3      private String name;
4
5      private void setName(String name)
6      {
7          if(name != "")
8              this.name = name;
9      }
10     private String getName()
11     {
12         return name;
13     }
14 }
15 public class Main
16 {
17     String name;
18     public static void main(String[] args)
19     {
20         Student s = new Student();
21         s.setName("Guru");
22         System.out.println(s.getName());
23     }
24 }
```

a. getName should be a void function

b. line 3: String name cannot be private

c. setName should not be a void function

d. getter and setter methods cannot be private ✔

Question 10

Correct

Mark 1.00 out of 1.00

Which among the following best describes encapsulation?

a. It is a way of combining various data members into a single unit

b. It is a way of combining various member functions into a single unit

c. It is a way of combining various data members and member functions into a single unit which can operate on any data

d. It is a way of combining various data members and member functions that operate on those data members into a single unit ✔
