Started on	Monday, 4 November 2024, 3:18 PM
State	Finished
Completed on	Friday, 8 November 2024, 6:49 PM
Time taken	4 days 3 hours
Marks	30.00/30.00
Grade	**100.00** out of 100.00
Name	DHIRU BHAI 730423104017

Question 1

Correct

Mark 10.00 out of 10.00

Write a program to create a new file "File.txt". If the file is created, your program should display **"File created successfully."** otherwise "**File creation failed!!!**"

Answer: (penalty regime: 0 %)

Language java

```
import java.io.File;
import java.io.IOException;
public class CreateFile
{
    public static void main(String args[])
    {
        File file = new File("File.txt");
        try
        {
            if (file.createNewFile())
            {
                System.out.println("File created successfully.");
             }
             else
             {
                 System.out.println("File already extists.");
             }
        }
```

	Test	Expected	Got	
✔	/*TC 1*/	File created successfully.	File created successfully.	✔

Passed all tests! ✔

Correct

Marks for this submission: 10.00/10.00.

Question 2

Correct

Mark 10.00 out of 10.00

Write a program to copy content from one file and write it into another file and display the same.

Input File: **input.txt**

Output File: **output.txt**

For example:

Test	Result
/*TC 1*/	File handling plays a major role in doing so as the first essential step is writing content to a file. For this is one must know how to write content in a file using the FileWriter class. The secondary step is reading content from a file and print the same. For this, one must have good hands on File Reader class to do so.
/*TC 2*/	File handling plays a major role in doing so as the first essential step is writing content to a file. For this is one must know how to write content in a file using the FileWriter class. The secondary step is reading content from a file and print the same. For this, one must have good hands on File Reader class to do so.

Answer: (penalty regime: 0 %)

Correct

Marks for this submission: 10.00/10.00.

Question 3

Correct

Mark 10.00 out of 10.00

Write a program to count the number of times a character appears in the File. (Case insensitive... 'a' and 'A' are considered to be the same).
Input file name is **input.txt**

Hint: Use FileReader and BufferedReader

For example:

Input	Result
g	`Character: g found! Count : 15`
z	`Character not found!`

Answer: (penalty regime: 0 %)
