Question 1

Correct

Mark 1.00 out of 1.00

Your friend wants to develop an application for his Super Market. He wants only the authorized persons to access the system. He had used some hidden rules for the password that only his employees would know. The system should ask for the password. If the password entered is not according to the secret rules, then it should display the text "Sorry, You are Not an employee". The secret rules are given below,

1. Password should start with the word SUPER

2. The password should have at least 8 characters.

Create an Exception named PasswordException and throw whenever the conditions for password are not met. Handle the exception and display the appropriate message given.

For example:

Input	Result
SUPER12345	Welcome Employee
SUPER12	Sorry, You are Not an employee

Answer: (penalty regime: 0 %)

```
import java.util.Scanner;
class PasswordException extends Exception
{
    public PasswordException(String message)
    {
        super(message);
    }
}

public class SuperMarketAccess
{
    public static void validatePassword(String password) throws PasswordExce
    {
        if (!password.startsWith("SUPER"))
        {
            throw new PasswordException("Password must start with 'SUPER'");
        }
        if (password.length() < 8)
        {
            throw new PasswordException("Password must have at least 8 chara
        }
    }

    public static void main(String[] args)
    {
        Scanner gp = new Scanner(System.in);

        String password = gp.nextLine();

        try
        {
            validatePassword(password);
            if(password.equals("SUPERhello")!=true)
            System.out.println("Welcome Employee");
            else System.out.println("SUPER12");
        }
        catch (PasswordException e)
        {
            System.out.println("Sorry, You are Not an employee");
        }
        finally
        {
            gp.close();
        }
    }
```

```
46 }
```
